## Profile

I am a junior full stack developer based near York who recently took the decision to change my life and learn a new skill. After graduating from a coding Traineeship as a full stack developer, I have begun work as a junior developer to gain commercial experience in the industry as I see myself working as a developer for the long term. Throughout my career to date, I have gained excellent analytical skills, which I hope to apply alongside my technical skills in a new and challenging role in development.

## Experience

### Developer, Mosaic Fulfilment Solutions – 2022-Present

- Part of a development team migrating multiple high value clients to a new system in an effort to lower company expenditure while increasing profit, utilising largely SQL
- Working in tandem with Project Managers and Client directly to ensure data, exports and reports all work correctly for smoothest transition
- Worked with relevant partner teams that deal in resolving support tickets, in order to both knowledge share and ensure support tickets are dealt with accurately and promptly

### Junior Developer, Novuna – 2022

- Part of a development team working on Java codebase which calls information from multiple third parties in order to agree, decline or refer to underwriting for financial transactions
- Working in tandem with Project Managers and Client directly using Jira to manage priority work tickets to ensure project is ready for launch

### Motor & Personal Lines Underwriter, NFU Mutual – 2021

- Servicing multiple portfolios of both new business and existing customers across motor and personal insurance policies
- Responsible for making judgements regarding incoming referrals leading to accepting business, applying terms or declining business
- Accountable for adhering to my own underwriting authority and reporting any breaches of authority I come across to the relevant teams

### Full Stack Developer Course, IT Career Switch – 2020-2021

- Completed a full stack developer course provided by IT Career Switch in conjunction with Codecademy
- Several highly intensive and thorough modules on several languages including: HTML, CSS, JavaScript, Java, PHP, Python, SQL & C#

- Successfully completed 'Microsoft MTA 98-383: Introduction to Programming' exam
- Completed two large independent projects from a hypothetical brief, both of which are available to view on my portfolio

## Education
